

The Status and Workflow of Artificial Intelligence for Artificial Lift

Patrick Bangert, Samsung

Artificial intelligence (AI) is a buzzword with a lot of hype but there are some genuine benefits that can be realized in the down-to-earth world of upstream oil and gas. This talk will briefly describe the status of AI in terms of what is realistic and what is hype. The workflow of an AI project will be discussed at a high level and put into context for artificial lift applications.
